PROFESSIONAL SUMMARY

Final-year CS student specializing in AI with 1+ year of experience in Flutter mobile development, ML model deployment, and IoT integration. Skilled in building AI-powered applications, REST APIs, and real-time data pipelines using deep learning, NLP, and cross-platform frameworks. Seeking a Software Engineer or Mobile App Developer role leveraging expertise in computer vision, on-device inference, and full-stack AI systems.

WORK EXPERIENCE

QBS Co.

Associate AI Engineer & Mobile App Developer

April 2026 – Present

- Built an MQTT-based IoT telemetry pipeline connecting Jetson Nano to a Flutter dashboard, streaming live inference, navigation data, and camera status in real time.
- Developed a Flutter monitoring dashboard with real-time object detection alerts, threat logs, and vessel navigation guidance via REST APIs and Firebase.
- Designed and deployed the full mobile application for **Verseye** (QBS Co), independently managing the complete lifecycle from UI/UX design to AI model integration.

Trainee AI Engineer & Mobile App Developer

Dec 2025 – April 2026

- Developed a cross-platform Flutter app using Google ML Kit Pose Detection for real-time contactless body measurement via camera, with BLE integration to stream live distance data from an ESP32 LiDAR sensor, managed using the BLoC pattern.
- Built a real-time rack detection Flutter app with a compiled Kotlin SDK (AAR), using ByteTrack tracking, CameraX, and TFLite to auto-capture product racks with a hide-business-logic plugin distribution model.

Intern AI Engineer & Mobile App Developer

Sept 2025 – Dec 2025

- Implemented real-time object detection using a fine-tuned computer vision model, optimising on-device inference for mobile deployment with TensorFlow.
- Integrated OCR-based product recognition transmitting extracted data to backend REST APIs for automated logging; assisted in AI-powered retail automation workflows.

Propele

Mobile App Developer Intern

Aug 2024 – June 2025

- Built a multi-method authentication system with secure email OTP login using Firebase Authentication.
- Integrated Zego UI Kit for real-time video and voice calls; implemented premium membership with gender-based access controls.
- Fixed Firestore caching issues, ensured real-time data sync on app resume, and managed in-app purchases with backend synchronisation using Agile workflows.

PROJECTS

FireVision: AI-Powered Fire Detection & Monitoring System

Jan 2026 – June 2026

- Developed a real-time fire detection system using YOLO, FastAPI, and Flutter with live RTSP/HTTP stream monitoring across multiple camera feeds.
- Implemented fire behaviour analytics including intensity estimation, movement tracking, and hazard prediction with SSE-based real-time alerts.
- Built a multi-camera, low-latency streaming architecture with a production-ready backend serving both web and mobile clients.

Grid Guard: AI-Powered Power Grid Monitoring System

Aug 2025 – June 2026

- Built a full-stack AI-powered power grid monitoring system using XGBoost, LightGBM, Random Forest, and FastAPI for real-time fault prediction and localisation.
- Developed a real-time streaming backend with FastAPI and SSE, delivering live AI insights to Next.js and Flutter applications.
- Designed a production-ready three-tier architecture (FastAPI + Next.js + Flutter) with Firestore, interactive maps, and fault-tolerant cloud synchronisation.

EDUCATION

NED University of Engineering & Technology

Oct 2022 – June 2026

Bachelor of Science in Computer Science – Specialization in Artificial Intelligence (CGPA: 3.585 / 4.00 — Karachi, Pakistan)

- Honor: Al Kusrar Scholarship – full-ride merit scholarship

TECHNICAL SKILLS

Languages: Python 3, C++, Dart, SQL, Kotlin

Frameworks & Libraries: Flutter, TensorFlow, PyTorch, Scikit-learn, BERT/Transformers, FastAPI, Bootstrap

AI & ML: Computer Vision (YOLO), NLP, Deep Learning, On-device Inference, IoT/MQTT

Databases & Tools: Firebase, Firestore, MySQL, REST APIs, Git, Android, Agile

ACHIEVEMENTS

Competitive Programming: KODERZ COMBAT – Advanced to Round 2 (Fall 2025), secured **3rd position**
